

VISIT NOTE

DATE OF VISIT	LOCATION OF VISIT
09/06/2024	In-Office
DURATION OF VISIT	CURRENT ONCOLOGIST
30 minutes	Sample Name, MD

PATIENT DEMOGRAPHIC INFORMATION	
PATIENT NAME	DATE OF BIRTH
John Doe	1950-01-01

PRESENTING PROBLEM
Patient presents with known breast cancer. Presents today for further evaluation and staging of the disease process.

VISIT CONTENT
Discussed results of recent imaging studies, including PET/CT scan. Confirmed poorly differentiated adenocarcinoma. Reviewed possible treatment options, including systemic chemotherapy, and discussed the need for further imaging for complete staging.

MEDICAL PLAN
Ordered further imaging studies, including a PET/CT scan of the breast, abdomen, and pelvis with contrast.

PATIENT RESPONSE

Patient is agreeable to the recommended further workup and treatment options.

ONCOLOGIST'S OBSERVATIONS

Patient is anxious about diagnosis but is engaged in decision-making. No signs of acute distress.
Exhibited understanding of the severity of diagnosis and the need for further staging and treatment.

DIAGNOSTIC IMPRESSIONS

Malignant neoplasm of nipple and areola, right female breast (C50.011)

PLAN FOR NEXT VISIT

Review results of further imaging studies. Plan systemic chemotherapy pending staging results.
Discuss referral to radiation oncology if brain metastasis is confirmed.

RETURN TO CLINIC

In 2 weeks for follow-up and review of imaging results.
